HA AUTHORIZED PROVIDER

CPR Cart Manassas

Experience the future of life support certification powered by the American Heart Association HeartCode® blended model: self-paced online coursework paired with a fast 30–minute automated skills session.

Modern Blended Certification

Combining interactive cognitive modules with precision voice-assisted manikins to certify healthcare providers faster, smarter, and with complete clinical confidence.

The HeartCode® Advantage

- **Flexible Online Learning:** Complete interactive clinical case scenarios at your own schedule, eliminating grueling 4-to-8 hour lecture blocks.
- **Rapid 30-Minute Skills:** Healthcare students seeking premier CPR Classes in manassas visit our North Manassas location for a fast, voice-directed skills evaluation.
- **Automated Precision:** Advanced RQI manikins provide real-time objective feedback on compression rate, recoil depth, and ventilation volume.
- **Instant 2-Year Credential:** Receive an official American Heart Association Provider eCard delivered to your inbox the exact same day.

Basic Life Support Provider

Foundation for Responders

Enrolling in an accredited **BLS Course** has never been simpler for local nurses, EMTs, dental staff, and medical personnel across Northern Virginia.

Master multi-rescuer resuscitation, AED deployment, and foreign-body airway obstruction through the HeartCode system with 30–minute self-service practical verification.

Advanced Cardiac Life Support

Critical Care Resuscitation

Through our comprehensive **ACLS Course**, intensive care physicians and telemetry nurses sharpen their command of acute cardiovascular arrest algorithms.

Analyze complex dysrhythmias, airway management, and targeted emergency pharmacology before executing practical airway and chest compression tests in just half an hour.

Pediatric Advanced Life Support

- **Pediatric Assessment Mastery:** Clinicians taking our accredited **PALS Course** gain advanced expertise in systematic child and infant triage.
- **Emergency Intervention Protocols:** Practice targeted clinical pathways for respiratory failure, decompensated shock, and pediatric cardiac dysrhythmias.
- **Efficient Hands-On Check:** Perform guided infant and child resuscitation mechanics using our automated RQI technology in under 30 minutes.
- **Licensing & CEU Credits:** Earn mandatory hospital compliance credentials accompanied by continuing education units on the spot.

Why Professionals Choose Us

30-Min Fast Track

Skip full-day classroom sessions. Practice skills at our self-service station and finish in 30 minutes flat.

Voice-Guided RQI

Smart manikins give instantaneous corrective prompts for depth, rate, and lung recoil during testing.

Instant AHA eCard

No waiting periods. Your official 2-year American Heart Association eCard is issued immediately upon passing.

Four Steps to Certification

1. Register Online

Select your course (BLS, ACLS, or PALS) and book your skills slot.

2. Complete HeartCode

Finish cognitive e-learning anytime from your computer or tablet.

3. 30-Min Skills Test

Visit our Manassas kiosk for hands-on manikin evaluation.

4. Receive Credentials

Get your official AHA eCard and CEUs instantly via email.

Comparative Training Overview

Comparison Metric	Traditional In-Person Class	CPR Cart Blended HeartCode®
Classroom Commitment	4 to 8 hours locked in a crowded room	**30 minutes hands-on skills session**
Lecture Flexibility	Rigid group schedule during business hours	**100% self-paced online learning 24/7**
Feedback Mechanism	Subjective visual inspection by instructor	**Objective digital RQI automated feedback**
Card Delivery Speed	Often delayed by 3 to 7 business days	**Instant same-day digital AHA eCard**

Efficiency & Compliance Metrics

30

Minutes Skills Check

Maximum Retention & Speed

The AHA HeartCode® model significantly optimizes time management for hospital staff and first responders. By decoupling didactic coursework from practical execution, providers retain critical life-saving protocols longer while minimizing time away from patient care.

Every session meets 100% of hospital Joint Commission and state licensing criteria with standardized, bias-free evaluations.

The Healthcare Standard

> **Resuscitation training must respect the relentless schedules of healthcare workers while never compromising quality.**

— American Heart Association Resuscitation Science Framework
