AMERICAN HEART ASSOCIATION TRAINING

Fast, Flexible CPR Certification

Experience the official AHA HeartCode® blended learning model across California. Complete interactive theory at your own pace and finish your hands-on verification in a brief 30-minute skill check.

Redwood City | San Francisco | Oakland | Temecula

The HeartCode Training Model

Part 1: Self-Paced Online

The HeartCode® module replaces traditional all-day lectures with engaging, interactive simulation software endorsed by the American Heart Association.

Whether you are a healthcare professional needing an **AHA BLS Certificate** or an educator renewing your credentials, you can complete the comprehensive cognitive modules anytime from your home or office.

Part 2: 30-Min Skill Check

Once the online portion is finished, learners simply schedule an appointment at their chosen CPRCart training hub for individual hands-on assessment.

Using advanced feedback mannequins and automated verification stations, this targeted in-person check takes approximately 30 minutes, allowing you to return to your shift immediately.

Fast-Track Skill Check

Targeted Hands-On Verification

Our automated CPR verification stations assess compression rate, depth, and ventilation accuracy with precision. Clinicians working toward their **AHA ACLS Certificate** experience efficient evaluation without sacrificing clinical standards.

Upon passing, official AHA credentials are delivered promptly to your email inbox.

Redwood City Facility

Serving San Mateo County and the Peninsula, our Redwood City training center offers prime convenience for hospital staff, dental professionals, and local caregivers.

- Healthcare workers seeking official **CPR Certification in Redwood City** can complete their testing right near Broadway and Twin Dolphin Drive.
- Automated RQI and verification stations guarantee zero waiting time upon your arrival.
- Weekend and evening time slots accommodate both rotating hospital shifts and academic programs.
- Instant generation of your American Heart Association digital eCard upon completion.

San Francisco Bay Center

Central Urban Convenience

Centrally located for San Francisco's hospital networks, biotech hubs, and universities, this training station delivers rapid verification. Candidates booking their **CPR Training in San Francisco** enjoy stress-free scheduling and fast checkouts.

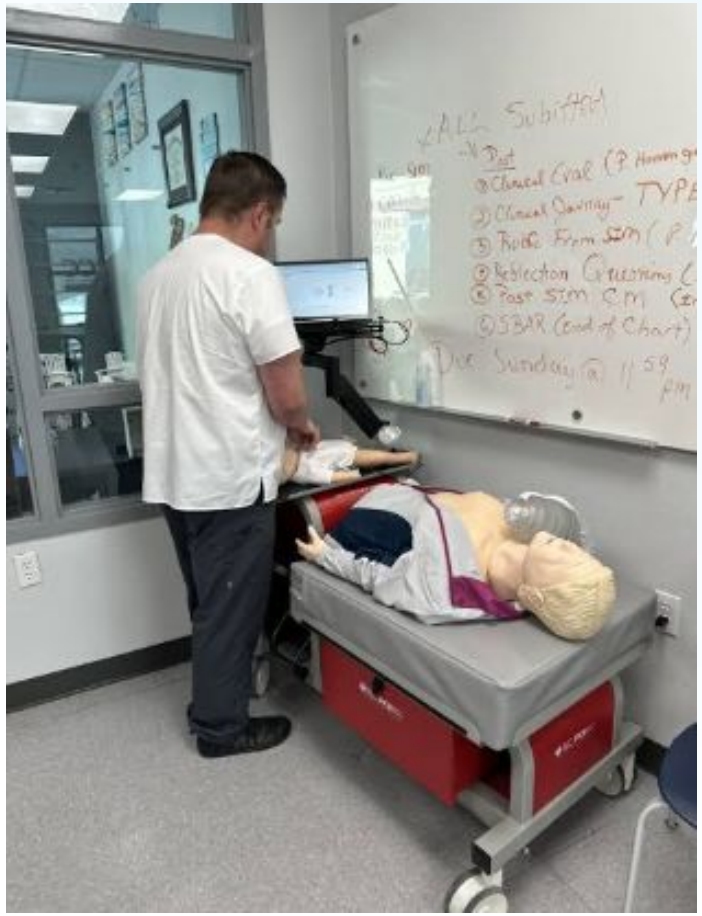

Arrive, practice on smart feedback mannequins, and receive your verified provider credential immediately.

Oakland Training Center

Our East Bay station provides accessible resuscitation certifications for emergency response teams, nurses, dental offices, and childcare operators throughout Alameda County.

- Healthcare providers and community members enrolled in **CPR Courses in Oakland** can finish in a fraction of traditional class time.
- Easily accessible with rapid transit connections and ample parking.
- Personalized simulation scenarios covering adult, child, and infant resuscitation.
- Official AHA certification cards are universally accepted by California hospitals and licensing boards.

Temecula Regional Campus

Southern California Access

Serving Riverside County and the Inland Empire, our Temecula site brings efficient HeartCode verification to Southern California providers. Professionals booking **CPR Classes in temecula** benefit from quick appointments that fit into busy clinical rotations.

Get certified seamlessly without spending weekends in crowded lecture rooms.

Core Certification Programs

HeartCode BLS

Designed for healthcare professionals, dental staff, and EMTs requiring high-performance CPR, bag-valve mask ventilation, and team resuscitation protocols.

HeartCode ACLS

Focused on adult cardiac arrests, acute coronary syndromes, stroke management, and advanced pharmacology for emergency and ICU personnel.

HeartCode PALS

Specialists pursuing an **AHA PALS Certificate** master pediatric emergency care, systemic respiratory support, and vascular shock interventions.
