HOW IT WORKS

Online learning + a 30-minute skill session.

The HeartCode® module replaces the traditional 4-hour classroom course with self-paced online coursework you finish on your own schedule. When you are ready, you come to the Bethesda station for a quick hands-on skills verification on an automated manikin that gives you real-time feedback. No instructor looking over your shoulder, no all-day commitment.

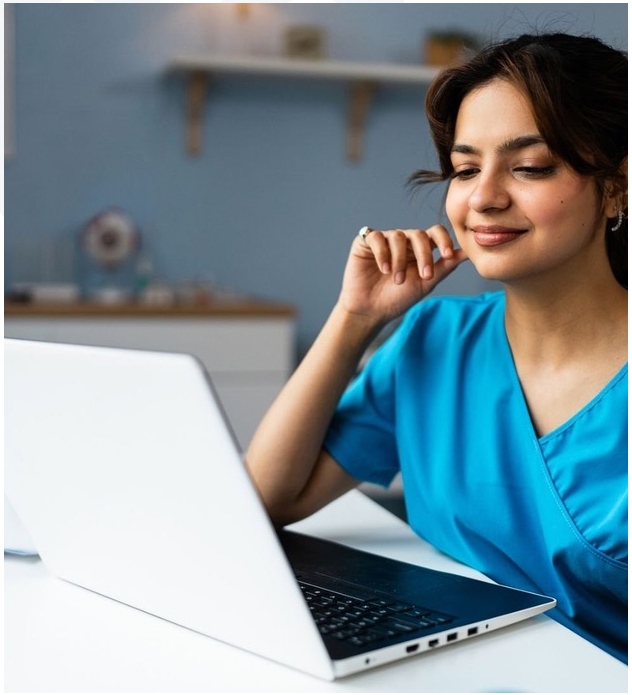

You walk out the same day with an official American Heart Association eCard in your inbox and CEU credits applied. It is the same credential, issued by the same authority — only faster, more flexible, and built around a working clinician's calendar.

Self-paced online

HeartCode® Part 1, completed anywhere

PCI® skill station

Automated manikin feedback, under 30 minutes

PART 1 · ONLINE

BLS PATHWAY

Single-rescuer BLS, verified in one short session.

The BLS Blended Course is designed for nurses, EMTs, medical assistants, and any clinician who needs to keep basic life support current. You complete the official AHA HeartCode® BLS module online — covering high-quality CPR, AED use, and team dynamics — then come to the Bethesda station for a roughly 30-minute skills verification on the RQI® automated manikin. Real-time depth, rate, and recoil feedback means you know exactly when your compressions meet AHA standard.

- **Who it's for**
  Bedside nurses, EMS, dental & outpatient staff
- **Online portion**
  HeartCode® BLS · ~1.5–2 hr self-paced
- **Skill session**
  RQI® station · under 30 min · same-day eCard

✓ AHA eCard issued instantly · CEU credits included

ACLS PATHWAY

ACLS renewal, built around a working clinician's week.

The ACLS Blended Course is the right pick for physicians, advanced practice providers, ICU and ER nurses, and respiratory therapists who need to keep advanced cardiovascular life support current without blocking a full day. You finish the AHA HeartCode® ACLS module online — covering pharmacology, ECG rhythm interpretation, megacode decision pathways, and post-cardiac-arrest care — then verify your skills at the Bethesda RQI® station in about 30 minutes. Automated manikin feedback and a self-service format mean no peer-evaluation stress, just clean skills confirmation.

- **Who it's for**
  MDs, APPs, ICU/ER nurses, RTs, pharmacists
- **Online portion**
  HeartCode® ACLS · ~3–4 hr self-paced
- **Skill session**
  RQI® station · under 30 min · same-day eCard

✓ AHA eCard issued instantly · CEU credits included

PALS · HEARTCODE®

PALS PATHWAY

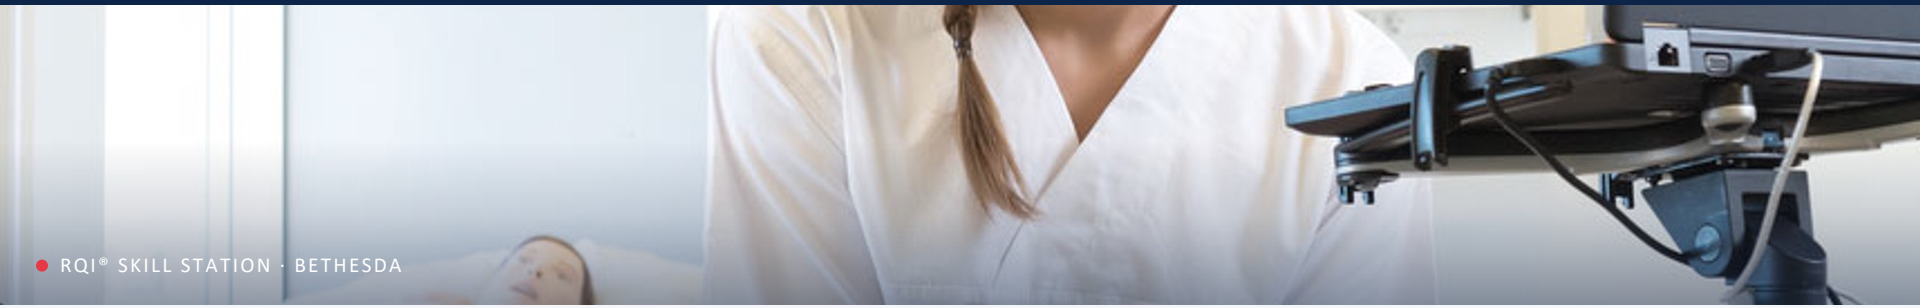

Pediatric resuscitation skills, kept current.

The PALS Blended Course is built for pediatricians, PICU and pediatric ER nurses, paramedics, and respiratory therapists who care for critically ill infants and children. You work through the AHA HeartCode® PALS module online — pediatric assessment, respiratory emergencies, shock, rhythm disturbances, and the systematic approach to a deteriorating child — then come to the Bethesda station for a roughly 30-minute skill verification. The RQI® infant and child manikins give immediate feedback on compression depth, ventilation volume, and rate, so you know your skills are within AHA spec before you leave.

- **Who it's for**
  Pediatricians, PICU/ED nurses, paramedics, RTs
- **Online portion**
  HeartCode® PALS · ~3–4 hr self-paced
- **Skill session**
  RQI® station · under 30 min · same-day eCard

STEP-BY-STEP

Two steps stand between you and your AHA eCard.

01 Complete the online module

Your CPR Certification in Bethesda starts here: register, get your HeartCode® login, and finish Part 1 online at your own pace. Pause, resume, and revisit modules until you are ready for the skill check. Most learners complete BLS online in 1.5–2 hours, ACLS and PALS in 3–4 hours.

SELF-PACED · ANY DEVICE · PAUSE ANYTIME

02 Verify at the RQI® station

Walk in at your scheduled time, log in to the station, and run your skills verification on the automated manikin. Real-time feedback confirms depth, rate, recoil, and ventilation. The session takes under 30 minutes — and your official AHA eCard is emailed the same day.

~30 MIN · REAL-TIME FEEDBACK · SAME-DAY ECARD

WHY CHOOSE US

Built for working clinicians, not classrooms.

CPR Cart brings the American Heart Association HeartCode® pathway to Bethesda as a self-service RQI® station — fast, flexible, and certified by the same authority.

✓ AHA Authorized

Your CPR Certification in Bethesda is built on official AHA HeartCode® coursework and eCards, issued directly by the American Heart Association.

⚡ Under 30 Min

Skills verification at the RQI® station is done in under 30 minutes.

◔ 24/7 Scheduling

Book the skill session slot that fits your shift — any day, any time.

✦ Same-Day eCard

Your AHA eCard and CEU credits are emailed the day you verify.

✦ Real-Time Feedback

Automated manikins score compression depth, rate, recoil, and ventilation.

☻ Zero Instructor Stress

No peer evaluation, no audience. Self-service format means you verify on your terms, calmly.

BETHESDA · AHA HEARTCODE®

Your next credential is one short visit away.

CPR Certification in Bethesda has never been this efficient. Register for your HeartCode® module today, finish the online portion on your schedule, then stop by the Sangamore Rd RQI® station for a 30-minute skill check. Your official AHA eCard lands in your inbox the same day. Same authority, same credential — minus the 4-hour classroom.
