

# **How To Setup IPTV on IBRAVER OX F10S?**

In this tutorial, we are going to show you how to bring IPTV channels to your iBravebox F10S receiver. This device works very similar to MAG boxes and installing IPTV on it is identical to MAG devices.

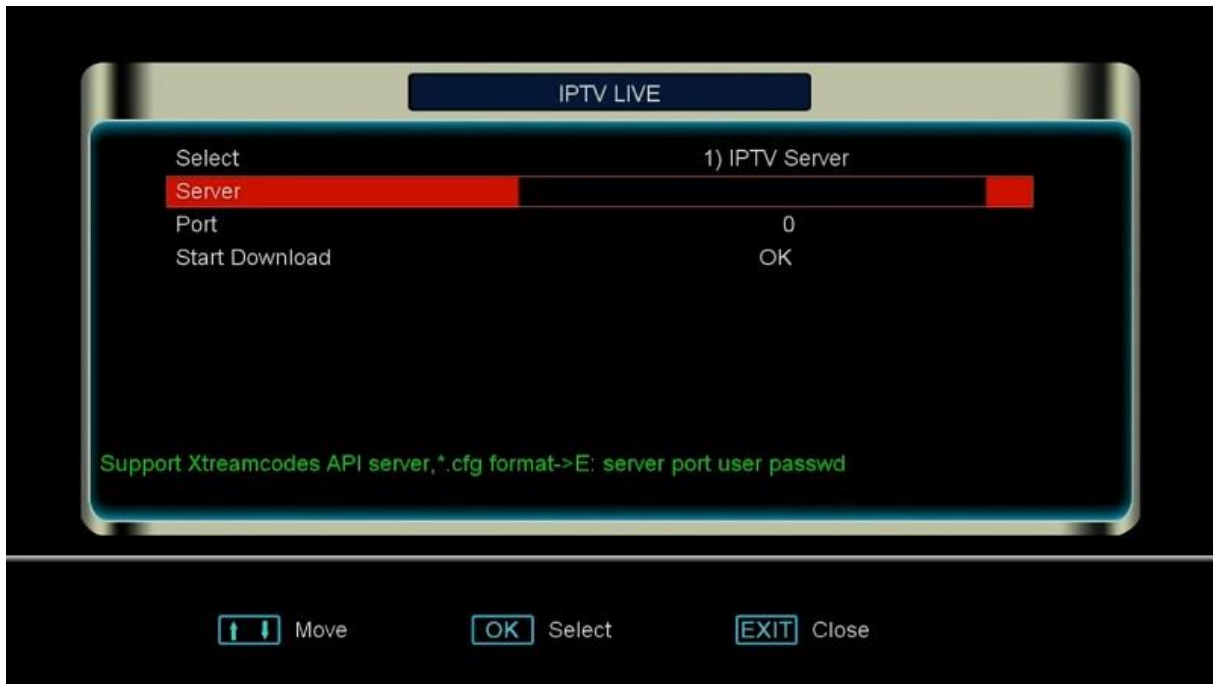

## How to bring IPTV channels to your iBravebox

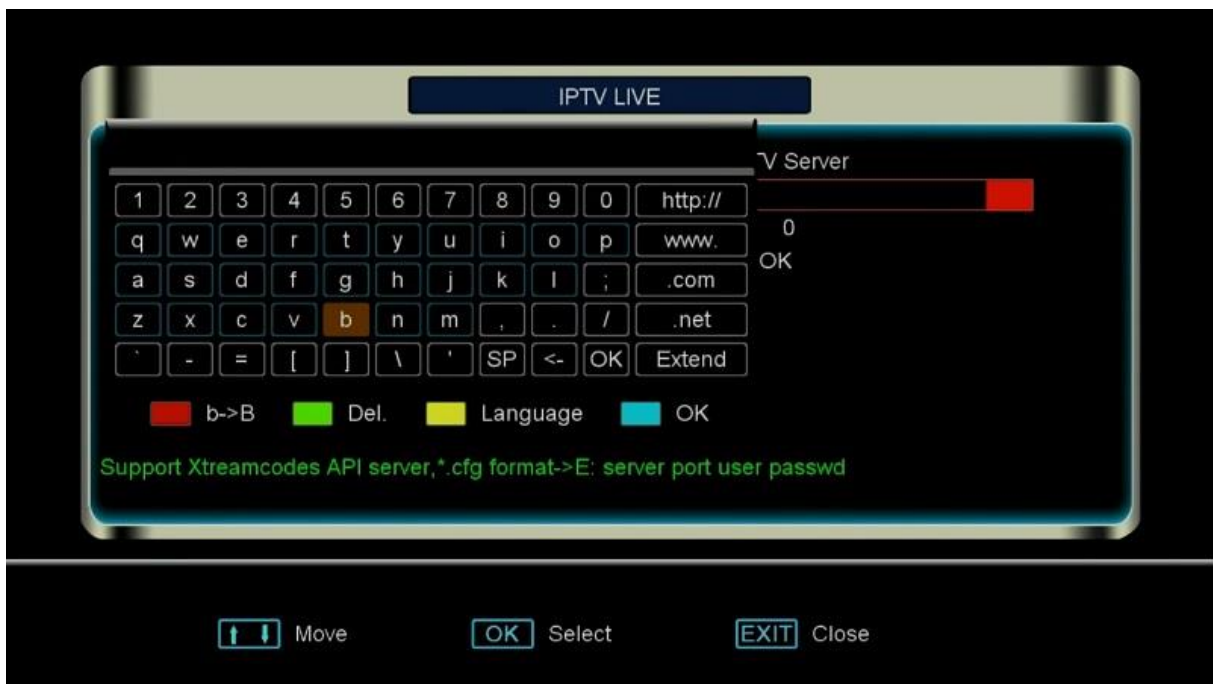

**Step 1:** Start by clicking on the “Multimedia” tab and selecting “Extream IPTV”.

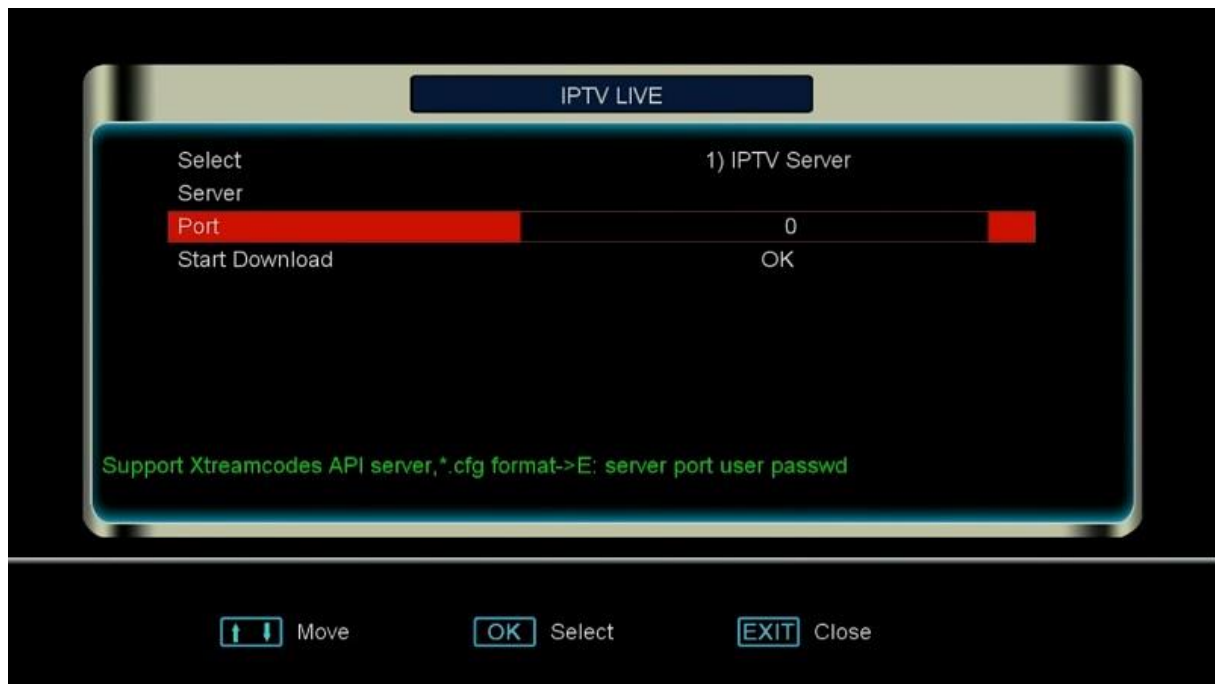

**Step 2:** Now click on “Server”.

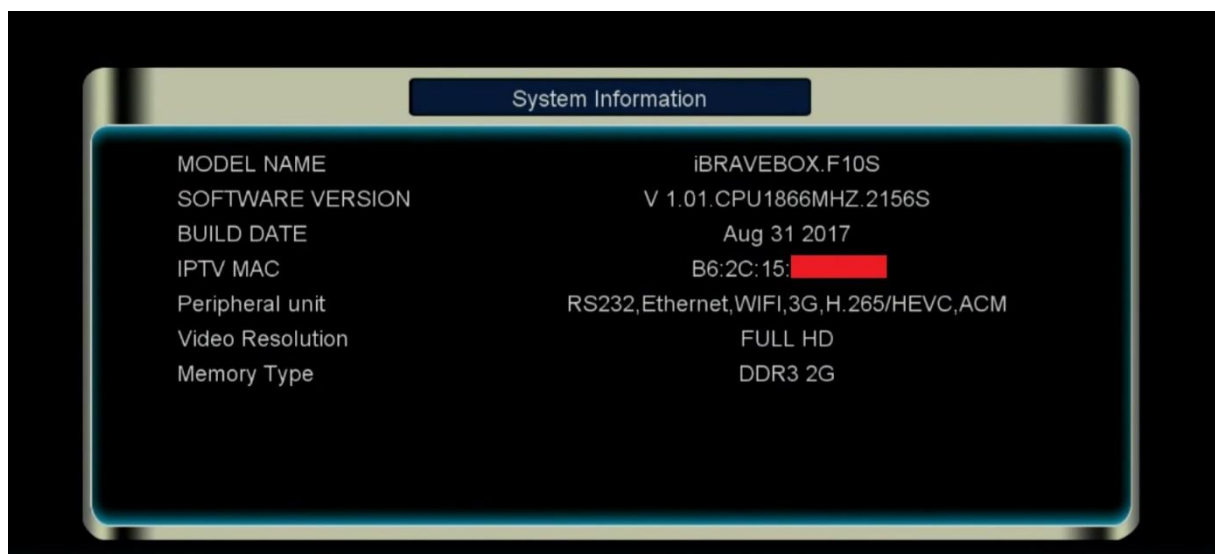

**Step 3:** Now enter the portal address provided by your [best IPTV provider](#) and click on "Ok". You must enter a MAG portal address.

**Step 4:** Now enter the port number. You can ask this from your IPTV provider, it usually is 8080 or 8181.

**Step 5:** Now proceed to the plugins tab from the main menu and click on “**System Information**”. Now insert the IPTV MAC to your IPTV dashboard and head back to Xtream IPTV section.

**Step 6:** Now click on “**Start Download**” and from now on you can start watching the channels. For adding extra content and improving the quality of this guide, feel free to submit a comment down below and help us out. Thank you.
